AUGUSTE CRYOGENICS HTCC MICROBULK SERIES

Auguste Cryogenics introduces its new product line of versatile, transportable microbulk tanks - the Auguste Cryogenics HTCC microbulk series. Initially available with 600 and 1,000 liter volume, these horizontal stainless steel tanks are sturdily built for operation in demanding over the road environments.

The vessels of the AC HTCC series are mountable on small trucks, allowing for the convenient distribution of liquefied cryogenic gas where you need it. Due to their transportability, flexibility and reliability, the containers are destined to become an irreplaceable part of your liquefied gas supply chain. All AC HTCC microbulk tanks are built to the highest standards in our ISO 9001 certified production facility in Košice/Slovakia. They feature the famous Auguste Cryogenics GOLD Standard vacuum with 5 years warranty and are TPED approved.

The Auguste Cryogenics HTCC microbulk series is the latest addition to the Auguste Cryogenics product portfolio, which covers all your cryogenic fluids needs from aluminum dewars, high capacity freezers, world-renown liquid cylinders, stationary/transportable microbulk tanks to horizontal and vertical bulk tanks for industry and new energy applications ranging from 2,000 to 250,000 liters capacity.
